

MADRID AGREEMENT AND PROTOCOL
FINAL DISPOSITION ON STATUS OF A MARK

STATEMENT OF GRANT OF PROTECTION
FOLLOWING A PROVISIONAL REFUSAL

notified to the International Bureau of the World Intellectual Property Organization in accordance with Article 5 of the Madrid Protocol and Rule 18ter(2)(ii) of the Common Regulations.

I. Office sending the statement:

Japan Patent Office (JPO)

II. International registration number: 1387075
Mark: METASYS
Date of international registration: 2017/06/09

III. Holder of the international registration:

Johnson Controls Technology GmbH

IV. Statement indicating that the mark is protected for the following goods and/or services.

*Accepted for all the goods and/or services in classes 37, 38, 41, 42 and 45.

9 Electrical controlling devices; electric control devices for energy management systems and security systems; automation process control systems comprising wireless and wired controllers, controlled devices, and software for appliances, lighting, HVAC, security and other commercial electrical power monitoring and control applications for buildings, facilities and plants; electronic control devices and automation process control systems comprising wireless and wired controllers, controlled devices, and software for building, facility and plant environmental, safety, security, fire, sprinkler, water flow, surveillance, tracking, emergency, energy, lighting, sound, display, threat detection, access, and asset management devices, apparatus and systems; electronic control devices and automation process control systems comprising wireless and wired controllers, controlled devices, and software for the on-site and remote monitoring, control, operation, automation, and optimization of, and interaction with, building, facility, and plant devices, apparatus and systems for heating, air conditioning, ventilation, refrigeration, energy use, allocation, maintenance, efficiency and stabilization, lighting, sound, communication, luminescent display, audio and video

*Note

The holder is required to pay the second part of the individual fee to protect the mark concerning the international registration in Japan [, as notified in a separate communication under Rule 34(3)(C) issued at the same time as the present statement]. Where the second part of the individual fee is not paid within the applicable period, the International Registration shall be cancelled with respect to Japan [Rule 34(3)(d)].

V. Date on which the statement was sent: 2019/03/20

VI. Signature or official seal by the office:

Continuation sheet

broadcast, battery and storage cell electrical charging, metering and payment, fire and smoke detection, alarm, suppression, containment and control, water flow, emergency evacuation, security access and alarms, CCTV, surveillance, asset and personnel tracking, light and motion detection, moisture detection, environmental hazard detection, threat detection and safety, gas detection, alarm and containment, asset management, manufacturing, and equipment and systems fault detection; on-site and field computer hardware, software, electronic sensors, monitors, electronic controls for refrigeration and HVAC systems, automated process control systems comprised of wireless and wired controllers, controlled devices, and software for individual and integrated on-site and remote monitoring, control, operation, automation and optimization of, and interaction with, building, facility and plant devices, apparatus and systems for heating, air conditioning, ventilation, refrigeration, energy use, allocation, maintenance, efficiency and stabilization, lighting, sound, communication, luminescent display, audio and video broadcast, battery and storage cell electrical charging, metering and payment, fire and smoke detection, alarm, suppression, containment and control, water flow, emergency evacuation, security access and alarms, CCTV, surveillance, asset and personnel tracking, light and motion detection, moisture detection, environmental hazard detection, threat detection and safety, gas detection, alarm and containment, asset management, manufacturing, and equipment and systems fault detection; computer hardware, software and automated process control systems comprised of wireless and wired controllers and controlled devices for gathering, collecting, aggregating, storing, sorting, analyzing and reporting data; computer hardware, software and systems comprised of wireless and wired controllers and controlled devices for gathering, collecting, aggregating, storing, sorting, analyzing and reporting data from building, facility and plant control, environmental, safety, security, fire, sprinkler, water flow, surveillance, tracking, emergency, energy, lighting, sound, threat detection, access, asset management, automation and optimization devices, apparatus and systems; computer hardware, software and systems comprised of wireless and wired controllers and controlled devices for gathering, collecting, aggregating, storing, sorting, analyzing and reporting data from building, facility and plant devices, monitors, monitoring systems, sensors, controls, control systems, and apparatus for heating, air conditioning, ventilation, refrigeration, energy use, allocation, maintenance, efficiency and stabilization, lighting, sound, communication, luminescent display, audio and video broadcast, battery and storage cell electrical charging, metering and payment, fire and smoke detection, alarm, suppression, containment and control, water flow, emergency evacuation, security access and alarms, CCTV, surveillance, asset and personnel tracking, light and motion detection, moisture detection, environmental hazard detection, threat detection and safety, gas detection, alarm and containment, asset management, manufacturing, and equipment and systems fault detection; computer hardware and software for wired and wireless networking of building, facility and plant control, environmental, safety, security, fire, sprinkler, water flow, surveillance, tracking, emergency, energy, lighting, sound, display, threat detection, access, asset management, automation and optimization devices, apparatus and systems; computer software for configuring wide area networks used in energy and security management systems and graphical user interface software; software for use in the creation, configuration, engineering, installation and operation of building, facility, and plant control, environmental, safety, security, fire, sprinkler, water flow, surveillance, tracking, emergency, energy, lighting, sound, threat detection, access, asset management, automation and optimization devices, apparatus and systems; software for recording, tracking, auditing and reporting the performance and compliance of environmental controls systems; application software for enabling the monitoring, control and operation of, and interaction with, building, facility, and plant devices, apparatus and systems for heating, air conditioning, ventilation, refrigeration, energy use, allocation, maintenance, efficiency and stabilization, lighting, sound, communication, luminescent display, audio and video broadcast, battery and storage cell electrical charging, metering and payment, fire and smoke detection, alarm, suppression, containment and control, water flow, emergency evacuation, security access and alarms, CCTV, surveillance, asset and personnel tracking, light and motion detection, moisture detection, environmental hazard detection, threat detection and safety, gas detection, alarm and containment, asset management, manufacturing, and equipment and systems fault detection using a remote computer, smart phone or other mobile device.
