

NOTIFICATION ABOUT TOTAL PROVISIONAL REFUSAL OF PROTECTION

sent to International Bureau of World Intellectual Property Organization
(WIPO) according to Rule 17(1) of the Common Regulations

I.	Office making the notification: Intellectual Property Agency under the Ministry of Justice of the Republic of Uzbekistan, 33, Khadra district, 100011, Tashkent (Uzbekistan) Telephone: (99871) 232-50-50 Fax: (99871) 232-50-05
II.	No of the International Registration: 1 251 408
III.	Name of the holder of the international registration: Internet group d.o.o.
IV.	Information concerning the scope of the provisional refusal: Total provisional refusal affects all the goods and/or services.
V.	Grounds for refusal: The presented combined trademark "TESLA" cannot be registered as a trademark, since it is phonetically identical with: -the verbal element "TESLA" of the combined trademark "TESLA" № 504569, registered in the international register on 21.03.1994 by TESLA Holding a.s. (Rubeška 215/1 Praha 9, Vysočany CZ-190 00) (CZ) for the similar goods of the classes 07, 09, 11. -the trademark "TESLA" № 504571, registered in the international register on 21.03.1994 by TESLA Holding a.s. (Rubeška 215/1 Praha 9, Vysočany CZ-190 00) (CZ) for the similar goods of the classes 07, 09, 11.
VI.	Corresponding essential provisions of the applicable law: Article 10.13 of the Law of the Republic of Uzbekistan «on Trade Marks and Service Marks and Appellations of Origin»
VII.	Information relating to the possibility to request a review: a) time limit for requesting review: 6 months from the date of notification of the provisional refusal to the International Bureau; b) Authority to which such request for review should be made: Intellectual Property Agency under the Ministry of Justice of the Republic of Uzbekistan (at the address mentioned in item I); c) Whether the request for review has to be filed in a specific language and/or through the intermediary of a representative whose address is within the territory of the Contracting Party: the assistance of the national patent attorney is obligatory. d) Other requirements, if any:
VIII.	Signature or official seal of the Office making the notifications: <div style="display: flex; justify-content: space-between; align-items: center; margin-top: 20px;"> Tukhtaeva K.M.  </div>
IX.	Date of the notification to the International Bureau: 15.12.2021

No 504569

The list of goods:

07

Machines, single-purpose machines and devices used in the production of electronic and electric apparatus, as well as parts thereof, particularly electronic machines for lithographic printing.

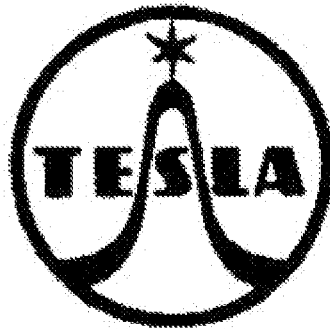

09

Electrochemical current sources, lasers and laser measuring and telecommunication devices, passive components, particularly resistors, thermistors, potentiometers, capacitors, connectors and other connection devices, small transformers, coils and other inductors, telecommunication relays, switches, printed circuits, protection elements, active components, picture tubes, X-ray tubes and other tubes, particularly photomultiplier tubes, hyper-frequency tubes, diodes, transistors, thyristors, including diacs and triacs, other discrete semiconductor detectors, crystal units, devices and parts made of piezoelectric ceramic, ceramic for microwaves, camera tubes, transmitter tubes, cathode ray tubes, storage tubes, tubes for microwaves, micro-electronic circuits, particularly monolithic integrated circuits, hybrid integrated circuits, display circuits, integrated switching circuits, integrated storage circuits, microprocessors, optoelectronic devices, particularly photoelectric components, light transmitting devices, viewing devices, electroluminescent panels, elements and circuits for microwaves, magnetic and electromagnetic components, ferrite components, different electronic circuits, particularly filters, apparatus and devices for signal transmission by optical fibers, apparatus and devices for wire communication, particularly telephone apparatus, telephone exchanges, dispatching and conferencing devices, intercommunication devices, video telephones, devices for transmission techniques, devices for digital transmission of information, devices used for integrated telecommunication networks, remote signaling, monitoring and measuring devices, radio-communication and television apparatus and devices, particularly television and radio broadcast transmitters, converters, antennas and antenna networks, radio-electric relay station equipment, radio-electric stations, radio monitoring and communication devices, industrial television, terrestrial devices for telecommunication by satellites, radio broadcast and television signal reception and distribution devices, radio distribution and audio dissemination apparatus and devices, devices for radio broadcast and television studios, including public address system and audio signal recording devices, devices for equipping mobile television units, control consoles, devices for announcers and performers, mixing consoles, including their accessories, particularly squelch units, electronic consumer devices, television receivers and radio receivers, including combinations thereof with other apparatus, video recorders, dictating apparatus, record players and gramophones, audio tape and cassette recorders, video cameras, tape and cassette recording equipment, phonoscopes, digital laserdisk reading equipment, recording carriers, particularly records, magnetic tapes, cassettes, magnetic disks, electronic amplifiers, accessories and spare parts for electronic consumer devices, particularly electromagnetic and electroacoustic converters, microphones, replay units and amplifiers, radars and navigational instruments, industrial electronic equipment, particularly electric and electronic

controlling, signaling and monitoring apparatus and devices for use in road, railway, naval and air transport, as well as in mine transport, including acoustic and optical signaling and displaying means, electronic and electric devices for protection against break-in and fire risks and similar devices for protection by means of alarms, apparatus for remote control, regulation and automation of industrial processes, including voice-controlled devices, sensors, pickups, actuators, remote control units, special electronic equipment for the textile industry, particularly fiber breakage sensors, remote control units for textile machines, electronic and electric apparatus, oscilloscopes and oscillographs, analyzing devices, particularly electron microscopes, electric and electronic apparatus and devices for recording, indicating, measuring, monitoring and testing, including non-electric quantity measuring apparatus, measuring apparatus for use in telecommunications, nuclear equipment, particularly particle accelerators, radioactive radiation monitoring, measuring and indicating apparatus, nuclear resonance spectrometers, meteorological apparatus, ultrasound devices, scientific and laboratory apparatus, scheduling pulse generators, particularly electronic metronomes, vacuum technology products, particularly electron multipliers, vacuum arc extinguishers, vacuum capacitors, vacuum apparatus and vacuum measuring apparatus, mass spectrometers, ultra-high vacuum devices, linear accelerators, microwave oscillators, coherent radiation generators, data input, transmission, processing and storage machines and devices, particularly computers, calculators, terminal units, display units, indicators, electric and electronic equipment for road vehicles, boats and airplanes, electronic devices for teaching and polytechnic education, including micro-computers, special materials for use in electrical engineering and electronics, particularly semiconductor materials, ferromagnetic substances, components, parts and accessories of all the aforesaid goods, electron tubes; television games.

11

Light sources, lamps, discharge lamps, fluorescent lamps, gas lamps, lighting fixtures, lighting devices; nuclear instruments.
