2. Date of this Office Action.
3. Examining Attorney's name and Law Office number.
4. Your telephone number and e-mail address.

OFFICE ACTION

RESPONSE TIME LIMIT: TO AVOID ABANDONMENT, THE OFFICE MUST RECEIVE A PROPER RESPONSE TO THIS OFFICE ACTION WITHIN 6 MONTHS OF THE MAILING OR E-MAILING DATE.

Serial Number 79/016726

INTERNATIONAL REGISTRATION NO. 0865884

This is a **PROVISIONAL FULL REFUSAL** of the trademark and/or service mark in the above-referenced U.S. application. 15 U.S.C. §1141h(c).

APPLICANT OR ATTORNEY CAN RESPOND TO PROVISIONAL REFUSAL:

Applicant may respond directly to this provisional refusal Office action, or applicant's attorney may respond on applicant's behalf.

NOTE: Attorneys hired to represent an applicant in a trademark matter before the Office must be eligible under 37 C.F.R. §10.14:

- (1) *Attorneys residing in the United States* who are in good standing with the bar of any United States court or the highest court of any state, may practice before the Office in trademark matters.
- (2) *A foreign attorney not residing in the United States* who is in good standing before the patent or trademark office of the country in which he or she resides, may practice before the Office in trademark matters only in cases where the patent and trademark office of that foreign country allows substantially reciprocal privileges to those permitted to practice before the Office. Currently, Canadian attorneys are the only foreign attorneys recognized as meeting this criterion. A foreign attorney who meets the requirements of 37 C.F.R. §10.14(c) can only represent parties located in the country in which the foreign attorney resides and practices. TMEP §602.

The Office cannot aid in the selection of an attorney. 37 C.F.R. §2.11.

If applicant is not represented by an attorney, applicant may appoint a domestic representative who would receive correspondence from the Office and be served process or notice of proceedings affecting the application. 15 U.S.C. §1141h(d); 37 C.F.R. §2.24.

THE APPLICATION HAS BEEN PROVISIONALLY REFUSED AS FOLLOWS:

The assigned trademark examining attorney has reviewed the referenced application, and has determined the following.

NO LIKELIHOOD OF CONFUSION

The examining attorney has searched the Office records and has found no similar registered or pending mark which would bar registration under Trademark Act Section 2(d), 15 U.S.C. Section 1052(d). TMEP section 704.01.

APPLICANT'S MARK IS MERELY DESCRIPTIVE

The examining attorney refuses registration on the Principal Register because the proposed mark merely describes the goods/services. Trademark Act Section 2(e)(1), 15 U.S.C. §1052(e)(1); TMEP §§1209 *et seq.*

A mark is merely descriptive under Trademark Act Section 2(e)(1), 15 U.S.C. 1052(e)(1), if it describes an ingredient, quality, characteristic, function, feature, purpose or use of the relevant goods/services. *In re Gyulay*, 820 F.2d 1216, 3 USPQ2d 1009 (Fed. Cir. 1987); *In re Bed & Breakfast Registry*, 791 F.2d 157, 229 USPQ 818 (Fed. Cir. 1986); *In re MetPath Inc.*, 223 USPQ 88 (TTAB 1984); *In re Bright-Crest, Ltd.*, 204 USPQ 591 (TTAB 1979); TMEP §1209.01(b).

The examining attorney must consider whether a mark is merely descriptive in relation to the identified goods/services, not in the abstract. *In re Omaha National Corp.*, 819 F.2d 1117, 2 USPQ2d 1859 (Fed. Cir. 1987); *In re Abcor Development Corp.*, 588 F.2d 811, 200 USPQ 215 (C.C.P.A. 1978); *In re Venture Lending Associates*, 226 USPQ 285 (TTAB 1985); *In re American Greetings Corp.*, 226 USPQ 365 (TTAB 1985). TMEP §1209.01(b).

It is not necessary that a term describe all of the purposes, functions, characteristics or features of the goods/services to be merely descriptive. It is enough if the term describes one attribute of the goods/services. *In re H.U.D.D.L.E.*, 216 USPQ 358 (TTAB 1982); *In re MBAssociates*, 180 USPQ 338 (TTAB 1973). TMEP §1209.01(b).

In this case, the proposed mark, SIBERIAN HEALTH, identifies the applicant's goods. As evidenced by the attached excerpts of articles retrieved in a Lexis-Nexis database search conducted on November 25, 2005, the term "Siberian health" is recognized as a term referring to a robust state of health. The term describes the purpose or function of the applicant's goods, which are intended to provide users with the benefits of "Siberian health." Also see the attached excerpts from websites retrieved on November 26, 2005.

APPLICANT MAY RESPOND

Although the examining attorney has refused registration, the applicant may respond to the refusal to register by submitting evidence and arguments in support of registration. If the applicant chooses to respond to the refusal to register, the applicant must also respond to the following requirements.

APPLICANT'S ENTITY TYPE/COUNTRY OF ORGANIZATION

Applicant must specify its entity type and citizenship. For example, an applicant can apply as an individual, a partnership, a corporation or a joint venture. 37 C.F.R. §2.32(a)(3); TMEP §§803.03 *et seq.* If applicant is an individual, then applicant must indicate his or her national citizenship for the record. 37 C.F.R. §2.32(a)(3)(i). If applicant is a corporation or association, then applicant must set forth the U.S. state or country (for foreign applicants only) under whose laws applicant is organized. 37 C.F.R. §2.32(a)(3)(ii). If applicant is a partnership or joint venture, then applicant must list the names and the national citizenship or the U.S. state or country (for foreign applicants only) of organization or incorporation of all the general partners or joint venturers, as well as specify the state or country under whose laws the partnership or joint venture is organized. 37 C.F.R. §§2.32(a)(3)(ii) and (iii).

AMENDED IDENTIFICATION REQUIRED

Applicant must clarify the identification of goods to specify the common commercial or generic name for the goods. If there is no common commercial or generic name, then applicant must describe the product and intended consumer as well as its main purpose and intended uses. In addition, the applicant must specify the conditions or illnesses which pharmaceutical preparations remedy, e.g., angina, diabetes. TMEP §1402.01.

For assistance with identifying goods and/or services in trademark applications, please see the online searchable *Manual of Acceptable Identifications of Goods and Services* at <http://tess2.uspto.gov/netahtml/tidm.html>.

Please note that, while the identification of goods and services may be amended to clarify or limit the goods and services, adding to or broadening the scope of the goods and services is not permitted. 37 C.F.R. §2.71(a); TMEP §1402.06.

Therefore, applicant may not amend the identification to include goods or services that are not within the scope of the goods and services set forth in the present identification.

The international classification of goods and/or services in applications filed under Trademark Act Section 66(a) cannot be changed from the classification given to the goods and/or services by the International Bureau of the World Intellectual Property Organization in the corresponding international registration. TMEP §§1401.03(d), 1401.04 and 1904.02(b).

The applicant has classified “credit card imprinters, non-electric” in International Class 16 and “fruit jellies” in International Class 29. The correct classification is International Class 8 and 30, respectively. The applicant must delete these goods from the application. 37 C.F.R. §§2.32(a)(7) and 2.85; TMEP §1401.04(b).

The applicant may adopt the following identification of goods, if accurate:

INTERNATIONAL CLASS 3: Cleansing milk for toilet purposes; cosmetic creams; cosmetic kits comprised of skin creams; non-medicated cosmetic preparations for bats; non-medicated cosmetic preparations for skin care; cosmetics; dentifrices; skin lotions for cosmetic purposes; oils for cosmetic purposes; perfumery; pomades for cosmetic purposes; potpourris; shampoos; soaps for personal use; cosmetic sun-tanning preparations; pre-moistened disposable tissues impregnated with cosmetic beauty lotions; and non-medicated toiletries.

INTERNATIONAL CLASS 5: Processed albuminous food adapted for medical purposes; pharmaceutical preparations containing albumen for the treatment of viral infections; biological preparations for medical purposes; cod liver oil; medicated confectionery; dietetic beverages adapted for medical use; dietetic foods adapted for medical use; dietetic processed foods adapted for medical use; baby food; pharmaceutical preparations for the treatment of blood disorders; lacteal flour adapted for use as baby food; liniments; medicinal herbs in dried or preserved form; mineral food supplements; nutritional additives for use in food for medical purposes; pharmaceutical preparations to facilitate teething; and multi-vitamin preparations.

INTERNATIONAL CLASS 16: Plastic or paper bags for merchandise packaging; booklets in the field of health care; books in the field of home health remedies; adhesive labels, not of textile; newspapers; note books; pamphlets in the field of healthy living; printed matter, namely, stationery; printed teaching materials in the field of health; cases for pens and pencils; and writing instruments.

INTERNATIONAL CLASS 29: Egg albumen for food; bouillon; bouillon concentrates; caviar; cheese; crayfish; crystallized fruits; edible fats; edible oils; eggs; fat-containing cheese spreads for bread slices; animal fats for foods; canned fish; fish; foods prepared from fish, namely, fish fillets and fish cakes; frozen fruits; canned fruits; fruit chips; fruit peels; preserved fruit; fruit pulp; fruit salads; stewed fruit; game; jams; jellies for food; marmalade; meat; canned meat; meat extracts; milk; milk products excluding ice cream, ice milk and frozen yogurt; preserved mushrooms; processed nuts; potato crisps; processed instant potato flakes; poultry; raisins; sausages; soups; tofu; canned vegetables; cooked vegetables; dried vegetables; vegetable puree juices used for cooking; preserved vegetables; vegetable salads; and weed plant extracts for soups.

INTERNATIONAL CLASS 32: Non-alcoholic cocktail mixes; fruit juices; fruit nectars; lemonades; non-alcoholic beverages, namely, carbonated beverages; non-alcoholic fruit juice beverages; non-alcoholic fruit extracts used in the preparation of beverages; vegetable juices; drinking water; and whey beverages.

RESPONSE GUIDELINES

No set form is required for response to this Office action. The applicant must respond to each point raised. The applicant should simply set forth the required changes or statements and request that the Office enter them. The

applicant must sign the response. In addition to the identifying information required at the beginning of this letter, the applicant should provide a telephone number to speed up further processing.

Pursuant to the restrictions set forth above, applicant may wish to hire a specialist attorney to assist in prosecuting this application because of the technicalities involved. The Office cannot aid in the selection of a trademark attorney. 37 C.F.R. §2.11. Applicant may wish to consult the Yellow Pages for a listing of attorneys specializing in trademark or intellectual property law, or seek guidance from its local Bar Association attorney-referral service.

If the applicant's has questions regarding the status of the application, the Trademark Applications and Registrations Retrieval (TARR) database on the USPTO website at <http://tarr.uspto.gov> provides detailed, up to the minute information about the status and prosecution history of trademark applications and registrations. Please note that an application serial number or registration number is needed to be able to access this database. TARR is available 24 hours a day, 7 days a week.

If the applicant has any questions or needs assistance in responding to this Office action, please telephone the assigned examining attorney.

[Add to Basket](#)

Model No.: Siberian

Product Origin: Russia

Brand Name: Siberian

Detailed Product Description

Specifications:

Siberian Pine nut oil is a product derived from the Cedar pine nut kernel by the traditional Russian technology - cold pressing. Famous Cedars of Siberian region are the wealth of our planet. Exactly from this ecologically pure place you are receiving this vitalizing oil. Pine nut oil was widely used in Siberia as a food product. It was also used for treatment of colds, frost bites, burns, stomach and intestines problems, kidneys problems and nervous breaks. The oil helped people to maintain its famous Siberian health and was widely exported abroad.

Recent research published in the nutrition literature has shown that Siberian Pine nut oil has high contents of Vitamin F, and the contents of natural and easily absorbed vitamin E, which is vitally important for our bodies, 400% more than in almond oil, 500% more than in olive oil and 300% more than coconut oil. It also contains vitamins of group B and group of unsaturated acids, which are very essential for our body. All this makes Siberian Pine nut oil especially valuable as a food supplement in our everyday life.

At this time we can produce (by old Russian technology - cold pressing) and supply up to 2000 liters/month of 100% Siberian Pine nut Oil. For current offer please contact us.

WELCOME TO MODIFILAN.COM

This site is dedicated to the promotion of a unique nutritional product called MODIFILAN, a concentrated brown seaweed extract. It is a patented natural food supplement which contains several organic elements found to be very beneficial to our health.

MODIFILAN was developed in Russia by a group of scientists who worked in the State Rehabilitation Institute, where victims of the Chernobyl nuclear catastrophe underwent treatment. The healing qualities of seaweed had been known for centuries, so the Russian government instructed scientists to find an effective and powerful remedy for the radiation poisoning of that particular population. After trying out various forms of algae, one type yielded the best scientific data for this purpose. It was the brown seaweed known as Laminaria japonica, which grows wild in the northern Pacific Ocean off the coast of uninhabited islands far to the east of Russia, known as the Kurils.

One of the main qualities of Laminaria is its high content of sodium alginates, which are enhanced by the extraction process used to produce MODIFILAN. Alginates are the most effective organic elements that enable the human body to get rid of heavy metals and toxins. Not all "algae" have alginates; blue or green algae does not. According to scientific testing, only this brown seaweed does! The unique methods of extraction, as well as the quality of this seaweed, are key. MODIFILAN has about 50% of the highest quality alginates.

The low-temperature processing of MODIFILAN causes a sloughing off of the heavy outer fibers of the seaweed, while retaining the essential properties of the plant. This process further enhances its bioavailability, making the Laminaria more digestible. Forty pounds of raw Laminaria are required to make one pound of MODIFILAN. Eating 8 capsules of extract a day provides the same amount of good, organic micro- and macro-elements contained in entire plate of this nutrient-rich seaweed. And, it is not cooked. The oldest Japanese recipes of preparing seaweed tell us to eat seaweed raw, rather than

cooked. The oldest Japanese recipes of preparing seaweed tell us to eat seaweed raw, rather than cooked. Modern science affirms that an anti-cancer substance called Fucoidan, as well as beneficial polysaccharides, will break down if the seaweed is cooked. This was determined when studies were performed on the Japanese island of Okinawa, known for its lowest cancer death rate in Japan.

Our intention, through our internet presence, is to introduce MODIFILAN and provide education about its many benefits. In the following pages, you will find much important information about this very special nutritional product - such as, studies done on MODIFILAN, other scientific data, testimonials from doctors, and personal experiences from customers who have chosen MODIFILAN as their answer for healthy living.

From all of us who brought MODIFILAN to you, THANK YOU for your interest, trust, and business. We wish you peace, love, and Siberian health!
