MADRID AGREEMENT
CONCERNING THE INTERNATIONAL REGISTRATIONS OF MARKS AND
THE PROTOCOL RELATING TO THE MADRID AGREEMENT
PROVISIONAL REFUSAL OF PROTECTION

notified to the International Bureau of the World Property Organization (WPO)

in accordance with Article 5 of the Madrid Agreement and the Protocol Relating to the Madrid Agreement

1. Office notifying the Provisional Refusal

Intellectual Property Agency, Government House 3, Central Avenue, Yerevan, 0010, Republic of Armenia

In accordance with paragraph 10 of Article 45 of the Law, within a period of two months from the day of receiving of the decision on refusal of the registration or the decision on a partly registration of a trademark, the applicant or his representative shall have the right to submit a request, containing solid arguments, on re-examination to the State Authorised Body.

In accordance with paragraph 2 of Article 55 of the Law, in case of non-compliance with a time within two months from the date of expiry of the initial time limit, submit a request to the State Authorised Body on restoration of lapse of time and continuation of the process to provide the unexecuted action within a period of two month.

In accordance with paragraph 2 of Article 40 of the Law, Natural persons, who do not have permanent residence in the Republic of Armenia, and foreign legal persons, which do not have a real and effective commercial or industrial entity in the Republic of Armenia, shall file the application and conduct proceedings provided by the procedure for the examination of applications in the State Authorised Body through trademark attorneys or other representatives. The authority of a patent attorney shall be validated by a power of attorney given by the person in the name of whom the registration of trademark is sought.

8. Date on which the refusal was pronounced 26.06.2013

9. Signature or official seal of the Office notifying the provisional refusal:

Jul 4 2013 3:41 PM

Article 9. Absolute Grounds for Refusal of Trademark Registration

1. A sign shall not be eligible for registration where it:

- (1) does not meet the requirements of Article 8 of this Law;
- (2) is devoid of any distinctive character;
- (3) consists exclusively of indexes or signs which serve, in trade, to indicate the time of production of the goods or of rendering of the service, type, quality, quantity, intended purpose, value, geographical origin or other characteristics of the goods and/or services;
- (4) consists exclusively of signs or indexes which have become common in the current language or acquire the fair reputation in trade practices;
- (5) represents exclusively the outward appearance of the goods which results from the nature (features) of the goods that is necessary to obtain a technical result or depict the purpose (functionality) of the goods, or gives substantial value to the goods;
- (6) is contrary to public policy or to principles of humanism or morality, or undermines national or spiritual values;
- (7) is liable for deceiving the public in regard to the geographical origin, quality, nature, or producer of the goods or services;
- (8) reproduces or includes state emblems, flags or symbols, official state names or their abbreviations, full or abbreviated names of international and intergovernmental organisations, official symbols, as well as hallmarks denoting state control, guarantee and fineness, stamps, seals, awards, and other distinguishing signs (in accordance with Article 6ter of the Paris Convention), or is resemble to them so as to create a likelihood of confusion;
- (9) reproduces marks or emblems, which are not protected by Article 6ter of the Paris Convention, but represents particular public interest;
- (10) includes symbols of great importance, in particular religious or cultural heritage, if it contains elements disgracing religious or moral values;
- (11) reproduces or includes elements which are identical with or which possess a confusingly resemble with the images or official names of the cultural heritage of the Republic of Armenia or the international cultural heritage, or confusingly resemble with images of cultural values kept in funds and collections, where the registration is claimed in the name of a person who is not the proprietor thereof and does not hold a relevant authorisation;
- (12) consists of or includes a geographical indication and has been filed for such goods, which are not originated from the area bearing this indication, if the use of that mark in the Republic of Armenia misleads the public as for the real origin of the goods. This provision shall also apply to the geographical indication which, despite that indicates the real origin of the goods, nevertheless confuse the public so as if the goods are originated from another area;
- (13) consists of or contains a geographical indication ascertaining wines, for wines not originated from the area bearing the geographical indication specified or a geographical indication ascertaining spirits, for spirits not originated from the area bearing the geographical indication specified, even if the real origin of the product is specified or the geographical indication is used in a translated version or in conjunction with such expressions as "sort", "type", "style", "imitation" and similar to them.

2. Subparagraphs 1. (2) - (4) of this Article shall not apply if the applicant produces sufficient evidence, that as a result of use, before the filing of the application, the mark assumed the distinctive feature with respect to the goods and/or services for which it was filed for registration.

3. Signs referred to in subparagraphs 1(8) and (9) of this Article may be included in the trademark as non protected elements, if they do not prevail over and there exists an authorisation by the appropriate Authorized Body;

4. Geographical indication and appellations of origin protected in the Republic of Armenia may be included in the trademark only in the case, when the applicant has acquire the right to use it, in accordance with the order established by law. The use of a geographical indication of other countries shall be permitted in the trademark if it is not contrary to the requirements of this Law, is registered in the country of origin and the applicant holds an authorisation to use it. Geographical indications and appellations of origin included in the trademark shall be considered as non protected elements in the trademark.

Article 10. Relative Grounds for Refusal of Trademark Registration

1. A sign shall not be subject to registration where it:

- (1) is identical to an earlier trademark, which is registered for the same goods and/or services;
- (2) If because of its identity with or similarity to an earlier trademark when the goods and/or services denoted by it, as well as its identity and similarity, is creating likelihood of confusion for the consumers, including correlation with the earlier trademark (confusingly similar);
- (3) is identical or similar to an earlier trademark and is to be registered for goods and/or services which are not similar to those goods and/or services, for which the earlier trademark is registered, in the case the earlier trademark has a reputation in the Republic of Armenia and if the use of the claimed trademark would lead to unfair advantages due to the distinctive feature or the reputation of the earlier trademark, or would be prejudicial to the distinctive feature or the reputation of the earlier trademark;
- (4) is identical or confusingly similar to the trade name of a person, which in the territory of the Republic of Armenia has acquired rights to that name prior to the date of application for the registration of the trademark or prior to the date of priority and which has, prior to that date, carried out actual activities in the field of production or services of the same or similar products (which the registration of the trademark has been applied for), where such identity or similarity will be prejudicial to the reputation of the trade name;
- (5) is identical or similar to a geographical indication or appellations of origin of goods protected in the Republic of Armenia, with the exception of cases when in the trademark, which is applied for registration, those goods are included as non protected elements and the application is filed by a person authorized to use the geographical indication or the designation of origin of goods;
- (6) reproduces or includes, with an earlier date of priority, subject matters of industrial design, utility model or any other subject matters of Industrial Property protected in the Republic of Armenia;
- (7) reproduces or includes literary, scientific or artistic works protected under the Law on Copyright, the names thereof, quotations, extracts (fragments) and characters thereof, if the rights have been acquired before the date of priority of the filing trademark (if there is an existence of such priority date).
- (8) reproduces or includes the name, surname or pseudonym of a well-known person or a portrait of any other person where the similarity to them leads to confusion.

2. For the purposes of paragraph 1 of this Article, earlier trademarks shall be the following:

(1) trademarks, which date of filing application precedes the priority date of the filing trademark that is in the discussion, or if a priority has been claimed in accordance with Article 42 of this Law, or if, in accordance with Article 42 of this Law, it has been claimed a priority to that priority date, shall be constituted as:

- (a) trademarks protected in the territory of the Republic of Armenia by virtue of registration;
- (b) trademarks protected in the territory of the Republic of Armenia by virtue of an international registration;

(2) trademark applications claimed for registration as referred to in subparagraphs (1) (a) and (b) of this paragraph, subject to granting of legal protection to them in the future;

(3) trademarks which have, by the date of filing application of trademarks or by the date of priority claimed in accordance with Article 42 of this Law, been declared as well-known in the Republic of Armenia in accordance with the order established by this Law.

3. The registration of a sign, under paragraph 1 of this Article, as a trademark may not be refused if an earlier trademark or the proprietor of an earlier trademark, or his/her successor or, in some cases, the appropriate State Authority has confirmed their consent thereto, with the exception of identical trademarks, which have been claimed for similar goods and/or services.

4. A trademark shall be subject to refusal if:

- (1) the it is filed by the agent or representative of a third person who is the proprietor of the trade or service mark in a country party to Paris Convention or member to the World Trade Organization, without the authorisation of that proprietor, unless the agent or representative justifies his action;
- (2) the trade mark is identical with, or similar to, an earlier trade mark which was registered for identical or similar goods or services and conferred on them a right which has expired for failure to renew within a period of a maximum of two years preceding application, unless the proprietor of the earlier trade mark gave his agreement for the registration of the later mark or did not use his trade mark;
- (3). The trade mark is liable to be confused with a mark which was in use abroad on the filing date of the application and which is still in use there, provided that at the date of the application the applicant was acting in bad faith. The applicant's actions are considered to be in bad faith if at the moment of filing the application the applicant knew or could know about the existence of such a trademark. The applicant's actions are considered to be in bad faith as well if for the purpose of registration of the trademark the applicant has provided such fake and groundless documents without the presence of which the registration of the trademark would not be possible.

Acetate of cellulose, unprocessed; acetates (chemicals); acetic anhydride; acetone; acetylene; acetylene tetrachloride; chemical compositions; acids; acidulated water for recharging batteries; acrylic resins, unprocessed; actinium; activate additives, chemical, to drilling muds; additives, chemical, to fungicides; additives, chemical, to insecticides; additives, chemical, to motor fuel; adhesive preparations for surgical bandages; adhesives for billposting; adhesives for industrial purposes; adhesive paperhanging; adhesives for wall tiles; agar-agar; agglutinants for concrete; agricultural chemicals, except fungicides, herbicides, insecticides and parasiticides; albumen (animal or vegetable, raw material); albuminized paper; alcohol; algal algarovilla (tanning material); alginates (gelling and inflating preparations) other than for alimentary purposes; alkalies; iodides for industrial purposes; alkaline metals; alkaline-earth metals; alkaloids; alum; alumina; aluminium acetate; aluminium chloride; aluminium hydrate; aluminium iodide; aluminium silicate; americium; ammonia; ammonia (volatile) for industrial purposes; ammonia alum; ammoniacal salts; ammonium aldehyde; ammonium salts; amyl acetate; amyl alcohol anhydrides; anhydrous ammonia; animal albumen (raw material); animal carbon; animal carbon preparations; animal charcoal preparations for engine coolants; antifreeze; anti-frothing solutions for batteries; anti-incrustants; anti-knock substances for internal combustion engines; antimony; antimony oxide; antimony sulphide; anti-sprouting preparations for vegetables; preparations, other than for household purposes; anti-tarnishing chemicals for windows; antranilic acid; argon; arsenic; artificial resins, unprocessed; artificial sweeteners (chemical preparations); astatine; automobile body fillers; auxiliary use with abrasives; bacterial preparations other than for medical and veterinary use; bacteriological preparations for agricultural purposes; bacteriological preparations other than for medical and veterinary use; balm of gourd (gurjun, gurjan) for making varnishes; barium compounds; barium sulphate; baryta; baryta paper; barytes; bases (chemical preparations); basic gallate of bisphenol A; beer preserving agents; beer-clarifying and preserving agents; bentonite; benzene derivatives; benzene-based acids; benzoic sulphide; berkelium; bicarbonate of soda for chemical purposes; bichloride of tin; bichromate of potassium; bismuth; biochemical catalysts; biological preparations, other than for medical or veterinary purposes; birdlime; bismuth; bismuth for chemical purposes; bleaching preparations (decolorants) for industrial purposes; blood charcoal; blueprint cloth; blue bone charcoal; borax; boric acid for industrial purposes; brake fluid; brazing fluxes; brazing preparations; brickwork preparations, except paints and oils; bromine for chemical purposes; by-products of the processing of cereals for industrial purposes; calcined soda; calcium carbide; calcium cyanamide (fertilizer); calcium salts; californium; camphor, for industrial purposes; carbolineum for the protection of plants; carbon; carbon black for industrial purposes; carbon for filters; carbon sulphide tetrachloride; carbonates; carbonic acid; carbonic hydrates; casein for industrial purposes; cassiopium (lutetium); caustic caustic alkali; caustic soda for industrial purposes; caustics for industrial purposes; cellulose; cellulose derivatives (chemicals); cellulose esters for industrial purposes; cellulose ethers for industrial purposes; cement (metallurgy); cement for boots; cement for mending broken articles; cement preservatives, except paints and oils; cement-waterproofing preparations; ceramic compositions for sintering (granules and powders); ceramic glazings; ceramic materials in particulate form, for media; cerium; chemical additives for oils; chemical condensation preparations; chemical intensifiers for paper; chemicals for rubber; chemical preparations for facilitating the alloying of metals; chemical preparations for protection against wheat smut; chemical preparations for scientific purposes, other than for medical or veterinary use; chemical preparations for meat; chemical preparations for the manufacture of paints; chemical preparations for use in photography; chemical preparations to prevent mildew; chemical preparations, except pigments, for the manufacture of enamel; chemical reagents, other than for veterinary purposes; chemical substances for analyses in laboratories, other than for medical or veterinary purposes; chemicals for preserving foodstuffs; chemicals for forestry, except fungicides, herbicides, insecticides and parasiticides; cleaners, chemical; chlorates; chlorides; chlorine; cholic acid; chromates; chrome alum; chrome salts; chromic acid; chromium oxide; cinematographic film, sensitized but not exposed; citric acid for industrial purposes; clarification preparations; cobalt oxide for industrial purposes; collodion; colour-brightening chemicals for industrial purposes; compositions (chemical additives to motor fuel); compositions for repairing inner tubes of tires (tyres); compositions for the manufacture of phonograph records; compositions for the manufacture of technical ceramics; compositions for thread in concrete preservatives, except paints and oils; concrete-aeration chemicals; condensation-preventing chemicals; cooling engines; copper sulphate (vitriol); corrosive preparations; cream of tartar, other than for pharmaceutical purposes; creosote for chemical purposes; crotonic aldehyde; cryogenic preparations; cultures of microorganisms other than for medical and veterinary purposes; currying preparations for leather; currying preparations for skins; cyanides (prussiates); cymene; damp proofing except paints, for masonry; defoliant; degreasing preparations for use in manufacturing processes; degumming preparations for industrial purposes; detergent additives to petrol (gasoline); detergents for use in manufacturing processes; dextrine size; diagnostic preparations, other than for medical or veterinary purposes; diastase for industrial purposes; diatomaceous earth; diazo paper; disinfectants; dispersions of plastics; distilled water; dolomite for industrial purposes; finishing preparations for textiles; dressing, except oils, for skins; drilling muds; dry ice (carbon dioxide); dysprosium; eucalyptus growing; electrophoresis gels, other than for medical or veterinary purposes; emollients for industrial purposes; emulsifying chemicals; engine-decarbonising chemicals; enzyme preparations for industrial purposes; enzymes for industrial purposes; epoxy resins, unprocessed; erbium; esters; ethane; ethers; ethyl alcohol; ethyl ether; europium; expanded clay for horticulture (substrate); stain-preventing chemicals for use on fabrics; fat-bleaching chemicals; fatty acids; ferments for cheese purposes; fermium; ferrocyanides; ferrotype plates (photography); fertilizers; fertilizing preparations; filtering materials (chemical preparations); filtering materials (mineral substances); filtering materials (unprocessed plastics); filtering materials (vegetable substances); filtering preparations for the beverages industry; finishing preparations for use in the manufacture of steel; extinguishing compositions; fireproofing preparations; fissionable chemical elements; fissionable material for nuclear energy baths (photography); fixing solutions (photography); flashlight preparations; flocculants; flour for industrial purposes; food preservatives; flowers of sulphur for chemical purposes; fluids for hydraulic circuits; fluorine; fluorspar compounds; formaldehyde for chemical purposes; foundry binding substances; foundry molding (moulding) preparations; foundry sand; fuel for atomic piles; fuel-saving preparations; fuller's earth for use in textile industry; fulling preparations; fulling preparation for textile industry; gadolinium; gallic acid for the manufacture of ink; gallium; gallnuts; gallotannic acid; galvanizing baths; preparations; gambier; gas propellants for aerosols; gas purifying preparations; gelatine for industrial purposes; gelatin for photographic purposes; getters (chemically active substances); glass-frosting chemicals; glass-staining chemicals; glass

glucose for industrial purposes; glucosides; glue for industrial purposes; gluten (glue), other than for stationery or house purposes; glutinous tree-banding preparations; glycerides; glycerine for industrial purposes; glycol; glycol ether; gold se mastic for trees; grafting wax for trees; graphite for industrial purposes; guano; tragacanth gum for use in manufactures for industrial purposes; gums (adhesives), other than for stationery or household purposes; heavy water; helium; holmi for hastening the ripening of fruit; horticulture chemicals, except fungicides, herbicides, insecticides and parasiticides; h top dressing; hydrates; hydrazine; hydro chlorates; hydrochloric acid; hydrofluoric acid; hydrogen; hydrogen peroxide; h soda; hyposulphites; industrial chemicals; iodic acid; iodine for chemical purposes; iodine for industrial purposes; iodise iodised salts; ion exchangers (chemical preparations); iron salts; isinglass other than for stationery, household or alime purposes; isotopes for industrial purposes; kainite; kaolin; ketones; kieselgur; krypton; lactic acid; lamp black for industr lanthanum; lead acetate; lead arsenate; lead oxide; leather glues; leather-dressing chemicals; leather-impregnating che leather-renovating chemicals; leather-waterproofing chemicals; lecithin (raw material); lime acetate; lime carbonate; lim limestone hardening substances; liquids for removing sulphates from accumulators; lithia (lithium oxide); lithium; litmus magnesite; magnesium carbonate; magnesium chloride; magnetic fluid for industrial purposes; malt albumen; manganz manganese dioxide; mangrove bark for industrial purposes; masonry preservatives, except paints and oils; mastic for le for tires (tyres); meat tenderizers for industrial purposes; mercuric oxide; mercury; mercury salts; metal earths; metal ha preparations; metalloids; methane; methyl benzene; methyl benzol; methyl ether; milk ferments for chemical purposes; moderating materials for nuclear reactors; moistening (wetting) preparations for use in bleaching; moistening (wetting) i for use in dyeing; moistening (wetting) preparations for use in the textile industry; mordants for metals; mould-release p must-fining preparations; naphthalene; neodymium; neon; neptunium; nitrate of uranium; nitrate paper; nitrates; nitric a nitrogenous fertilizers; nitrous oxide; oenological bactericides (chemical preparations used in wine making); oil cement dispersants; oil-bleaching chemicals; oil-purifying chemicals; oils for currying leather; oils for preparing leather in the co manufacture; oils for tanning leather; oils for the preservation of food; oil-separating chemicals; oleic acid; olivine (cherr preparations); opacifiers for enamel or glass; organic-bleaching chemicals; oxalates; oxalic acid; oxygen; palladiou ch pulp; peat (fertiliser); peat pots for horticulture; pectin (photography); perborate of soda; percarbonates; perchlorates; p persulphuric acid; petroleum dispersants; phenol for industrial purposes; phosphates (fertilisers); phosphatides; phosph phosphorus; photographic developers; photographic emulsions; photographic paper; photographic sensitizers; photome photosensitive plates; picric acid; plant growth regulating preparations; plasticizers; plastics, unprocessed; plastisols; pl polish removing substances; polonium; potash; potash water; potassium; potassium dioxalate; potato flour for industria power steering fluid; praseodymium; preparations for preventing the tarnishing of glass; preparations for preventing the lenses; preparations for stimulating cooking for industrial purposes; preparations for the separation of greases; prepara distillation of wood alcohol; preservatives for pharmaceutical preparations; preservatives for tiles, except paints and oils protactinium; protective gases for welding; protein (raw material); pyrogallic acid; pyroligneous acid (wood vinegar); que industrial purposes; radiator flushing chemicals; radioactive elements for scientific purposes; radium for scientific purpo rare earths; reagent paper; reducing agents for use in photography; refrigerants; renovating preparations for phonograp rhodium; rock salt; roentgen films, sensitized but not exposed; rubber preservatives; rubidium; saccharin; sal ammoniac ammoniac spirits; salicylic acid; salpetre; salt for preserving, other than for foodstuffs; salt, raw; salts (chemical prepara (fertilisers); salts for coloring (colouring) metal; salts for galvanic cells; salts for industrial purposes; salts from rare earth of alkaline metals; salts of precious metals for industrial purposes; samarium; sauce for preparing tobacco; scale remov preparations, other than for household purposes; scandium; sea water for industrial purposes; seaweeds (fertilizers); se seed preserving substances; selenium; self-toning paper (photography); sensitized cloth for photography; sensitized filr unexposed; sensitized paper; sensitized photographic plates; sensitized plates for offset printing; separating and unstic preparations; silicates; silicon; silicones; silver nitrate; silver salt solutions for silvering; sizing preparations; slag (fertilise (metallic) for industrial purposes; soda ash; sodium; sodium salts (chemical preparations); soil conditioning preparation chemicals; soldering fluxes; solidified gases for industrial purposes; solutions for cyanotyping; solvents for varnishes; si industrial or agricultural purposes; sorrel salt; spinel (chemical preparations); spirits of vinegar (dilute acetic acid); enarr staining-chemicals; starch for industrial purposes; starch paste (adhesive), other than for stationery or household purpc size (chemical preparations); starch-liquifying chemicals (ungluing agents); stearic acid; strontium; substances for previ stockings; substrates for soil-free growing (agriculture); sulphates; sulphides; sulphonic acids; sulphur; sulphuric acid; s sulphurous acid; sumac for use in tanning; super phosphates (fertilisers); synthetic materials for absorbing oil; synthetic unprocessed; talc (magnesium silicate); tan; tannic acid; tannin; tanning substances; tan-wood; tapioca flour for industr tartar other than for pharmaceutical purposes; tartaric acid; technetium; tellurium; tensio-active agents; terbium; test pa tetra chlorides; textile-brightening chemicals; textile-impregnating chemicals; textile-waterproofing chemicals; thallium; t thorium; thulium; tire repairing compositions; titanite; titanium dioxide for industrial purposes; toluol; toning baths (photo toning salts (photography)); toxic gas neutralizers; preparations of trace elements for plants; transmission fluid; tree cav (forestry); tungstic acid; uranium; uranium oxide;
