a) If the trademark applied for is identical with a registered trademark or a trademark that has an earlier application date and the protection is sought for the identical goods and services,

b) If because of its identity with or similarity to a trademark which has an earlier application date or a registered trademark and because of the identity or similarity of the goods and services covered by the trademarks there exists a likelihood of confusion on the part of the public and the likelihood of confusion includes the likelihood of association with the registered trademark or with the trademark which has an earlier application date.
