Extract from the Finnish Trademarks Act
No. 7 of January 10, 1964, as amended
(Unofficial translation)

Article 1

Registration shall confer exclusive rights in a trademark as a special symbol for distinguishing goods to be offered for sale, or otherwise purveyed in business, from those of others.

Any kind of mark that can be represented graphically and by means of which goods marketed in business can be distinguished from those of others may be a trademark. A trademark may in particular consist of words, including personal names, figures, letters, numerals or the shape of goods or of their packaging.

The provisions of this Act concerning goods shall apply by analogy to services.

Article 3

Any person may use his surname, address or trade name in his business as a trade symbol for his goods unless that use is liable to cause confusion with another's protected trademark, or with a name, address or trade name already being lawfully used by another in his business.

The foregoing provision on trade names applies also to the auxiliary trade name and secondary symbol referred to in the Trade Names Act.

The name or trade name of another may not be included in a trademark; neither may the auxiliary trade name or secondary symbol of another be included in a trademark except where they lack distinguishing power or where the branches of trade or kinds of goods concerned are different.

Article 6

Trade symbols shall be regarded under this Act as liable to cause confusion only if they apply to goods of identical or similar type.

Notwithstanding the foregoing, the confusability of trade symbols may be judged in favor of a symbol that has a reputation in Finland where the use of another's trade symbol without due cause would constitute unfair exploitation of, or action detrimental to, the distinctive character or fame of the earlier trade symbol.

The second paragraph of this Article shall apply also to the auxiliary trade names and secondary symbols referred to in the third paragraph of Article 3.

Article 13

To be eligible for registration, a trademark must be capable of distinguishing its proprietor's goods from those of others. A mark that denotes either alone or with only few alterations or additions, the kind, quality, quantity, use, price or place or time of manufacture of the goods shall not, as such, be regarded as distinctive. Neither shall a mark be regarded as distinctive, if it is solely composed of a form that is characteristic of the goods, necessary for achieving a technical result or that substantially increases the value of the goods. In assessing whether a trademark possesses distinguishing power, all the factual circumstances shall be borne in mind, particularly the length of time and extent to which the mark has been used.

Article 14

A trademark shall not be registered:

- (1) if it is contrary to law and order, or to morality;
- (2) if it is liable to mislead the public;
- (3) if, without proper permission, it incorporates national armorial bearings, a national flag or other emblem, a sign or hallmark indicating control and warranty used by the State for goods of the same type as those for which the trademark is sought or a similar type, the armorial bearings of a Finnish commune, or the flag, armorial bearings or other emblem, name or abbreviated name of an international organization or any device or emblem, name or abbreviated name liable to be confused with the symbols or emblems, marks, names or abbreviations referred to in this item;
- (4) if it is composed of or contains anything likely to give the impression of being the protected trade name of another or the auxiliary trade name or secondary symbol of another as referred to in the third paragraph of Article 3, or of being the name or likeness of another person, unless such name or likeness plainly relates to a person long dead;
- (5) if it is composed of or contains anything likely to give the impression of being the title of another's protected literary or artistic work, such title being original in character, or if it constitutes an infringement of another's copyright in such a work or of his rights in a photographic illustration or a protected design;
- (6) if it is liable to be confused with the name or protected trade name of another trader, with an auxiliary trade name or secondary symbol of the kind referred to in the third paragraph of Article 3, with the trademark of another which has been registered on the basis of an earlier application or with the trade symbol of another party that is already established when registration is sought;
- (7) if it is liable to be confused with a trade symbol being used by another party for his goods at the time of the application, and if the applicant was aware of that use at the time of his application and had not used his own mark before the other trade symbol came into

use;

(8) if it is liable to be confused with a trademark protected by an international registration valid in Finland or the European Community that on the basis of this registration enjoys an earlier right in Finland or the European Community;

(9) if it is liable to be confused with a Community trade mark within the meaning of Article 57 that has been registered on the basis of an earlier application or that has seniority from Finland under Article 34 or 35 of the Council Regulation referred to in Article 57;

10) if it is liable to be confused with a registered name of a plant variety; or

11) if there is an obstacle to registration within the meaning of Council Regulation (EEC) No. 2081/92 on the protection of geographical indications and designations of origin for agricultural products and foodstuffs.

In the cases referred to in items (4) to (9), registration may be granted if the person whose right is concerned agrees thereto, and provided that the registration does not contravene any of the other provisions of the first paragraph of this Article.

Article 15

The exclusive rights in a trademark acquired by registration do not cover any part of the mark that cannot be registered as such.

If the trademark contains any such part and there are special reasons to believe that its registration may cause uncertainty regarding the extent of the exclusive rights granted, protection of the part may be specifically disclaimed when the registration is made.

If a part of a trademark excluded from protection later becomes registrable, a new registration may be made to cover that part or the entire trademark without the exclusion of the part from protection.

Article 17

The application for registration of a trademark shall be filed in writing with the registering authority. The application shall indicate the name or trade name of the applicant and the goods and classes of goods for which the mark is intended. The mark shall be clearly shown in the application.

A filing fee shall be paid on the filing of the application. The application shall not be considered filed until the fee has been paid.

Article 56a

When the registration authority receives a notification of an international registration having effect in Finland from the International Bureau, it shall examine whether there is any obstacle to the registration.

Article 56b

If the registration authority finds that a trademark filed for international registration does not comply with the conditions of registration laid down in this Act, it shall notify the International Bureau that the international registration has no effect in Finland. The registration authority shall notify its refusal, together with a statement of all grounds, to the International Bureau before the expiry of a period of 18 months from the date of the International Bureau notification referred to in Article 56a.

If the statement issued by the proprietor of an international registration commenting on the notification by the registration authority referred to in the foregoing paragraph does not present any grounds on which the trademark could be deemed to comply with the conditions of registration laid down in this Act, the registration authority shall rule that the international registration has no or only a partial effect in Finland.

If the proprietor of an international registration has not within the given time limit submitted his statement commenting on the registration authority's notification referred to in paragraph 1, the international registration shall not take effect in Finland. If the said notification only concerned some of the goods in the international registration, the international registration shall take effect in Finland in respect of those of the goods that the notification did not concern.

Article 56c

If no obstacle to registration is found, the registration authority shall give public notice of the International Bureau notification referred to in Article 56a as laid down in the first paragraph of Article 20. The public notice shall specify the date accorded to the international registration by the International Bureau.

Any opposition to an international registration in Finland shall be filed in writing with the registration authority within two months of the date of the public notice.

Article 56 f

If the proprietor of an international registration who is not domiciled in Finland wishes to submit a statement to the National Board of Patents and Registration of Finland, the proprietor must appoint a representative resident in the European Economic Area. A corporate body domiciled in the European Economic Area may also act as a representative.
